Clearview Regional High School District
2021 Summer Assignment Coversheet

| Course: | Advanced Math 7 and Math 7 |
| :--- | :--- |
| Teacher(s): | Gunning, Massi, Miller, Musto, Santoro |
| Due Date: | To assess the students understanding of concepts necessary for <br> success in Math 7 and Advanced Math 7. |
| Purpose of <br> Assignment: | Students will solve basic skills problems (involving whole numbers, <br> fractions, and decimals) and larger word problems. All problems <br> are to be solved without the use of a calculator. |
| Description of <br> Assignment: | The Number System <br> 6.NS.1, 6.NS.2, 6.NS.3, 6.NS.4, 6.NS.8 <br> Expressions and Equations |
| New Jersey Student <br> Learning Standards <br> (Content) covered: <br> 6.EE.2 <br> Geometry <br> 6.G.1, 6.G.2 |  |
| Specific Expectations: | This assignment is optional. Students may complete the packet and <br> seek additional practice (see additional resources below) for any <br> developing skills where needed. |
| Where to Locate <br> Assignment: | Clearview Website <br> www.clearviewregional.edu |
| Teacher Contact <br> Information: | Mrs. Jill Miller <br> jmiller@clearviewregional.edu <br> Ms. Nicole Santoro <br> nsantoro@clearviewregional.edu |
| Mr. Dan Massi <br> dmassi @clearviewregional.edu |  |
| Ms. Sarah Musto <br> smusto@clearviewregional.edu <br> Ars. Tara Gunning <br> tgunning@clearviewregional.edu |  |

## Welcome to Clearview Middle School! <br> Math 7 and Advanced Math 7

This assignment is designed to help you start Math 7 or Advanced Math 7 successfully. It may also help you identify any areas that you need to strengthen beforehand. Math 7 covers all $7^{\text {th }}$ grade standards and focuses on fluency and retention for success in $8^{\text {th }}$ grade. The Advanced Math 7 course is designed to increase the level of challenge within the $7^{\text {th }}$ grade standards. This course moves at an accelerated pace, includes timed assessments throughout the year (many without the use of a calculator), and includes work with some $8^{\text {th }}$ grade concepts.

## I. Skills Fluency

Add, Subtract, Multiply or Divide as indicated. Show correct work without the use of a calculator.

| 1] $35 \times 26$ | 2] $493 \times 67$ |
| :--- | :--- |
| 3] Use long division: $2230 \div 9$ | 4] Use long division: $1620 \div 36$ |
| 5$] 43.96+82.78$ | $6] 146.53-65.9$ |
| 7$] 12.5 \times 3.7$ |  |

| 9] $\frac{3}{4}+\frac{5}{7}$ | 10] $\frac{7}{9}-\frac{3}{5}$ |
| :--- | :--- |
| 11] $5 \frac{2}{3}+3 \frac{5}{8}$ | $12] \frac{6}{7}-2 \frac{2}{3}$ |
| 13] $10 \frac{1}{3}-3 \frac{7}{8}$ | $14] \frac{27}{40} \times \frac{20}{63}$ |
| 17$] ~$ |  |
| $15 \frac{2}{5} \div 20$ |  |

Evaluate using the Order of Operations

| 19$] \quad$ 20] $20 \div 5 \times 2-(6+2) \times 7$ |  |
| :--- | :--- |
|  |  |

Evaluate if $a=9$ and $b=\frac{1}{4}$.

| 21$] 5 a-12 b$ | 22] $36 b+7 a$ |
| :--- | :--- |
|  |  |

Change the mixed numbers to improper fractions.

| 23$] ~$ | $\frac{11}{17}$ |
| :--- | :--- |
| 24] $9 \frac{3}{61}$ |  |

Change the improper fractions to mixed numbers.

| 25$] \frac{10}{7}$ | $26] \frac{132}{11}$ |
| :--- | :--- |

Find all the factors.

| 27$] 45$ | $28] 72$ |
| :--- | :--- |

Find the Least Common Multiple of the two numbers.

| 29$] 8$ and 10 | $30] 108$ and 72 |
| :--- | :--- |

Simplify to lowest terms.

| 31$] \frac{66}{99}$ | $32] \frac{35}{42}$ |
| :--- | :--- |

Find the area of each figure.

Find the surface area and volume of each rectangular prism.

## II. Make Sense of Problems and Persevere in Solving 'Them

Remember, we are not looking for perfection. We are looking for written evidence that you are doing your best to make sense of the problem and persevering in solving it. These problems are based on $6^{\text {th }}$ grade standards, so you have all the math knowledge you need to solve them! Enjoy.

These problems are taken from www.illustrativemathematics.org

P1. Rectangle Perimeter - Sadie computes the perimeter of a rectangle by adding the length, $l$, and width, $w$, and doubling this sum. Eric computes the perimeter of a rectangle by doubling the length, $l$, doubling the width, $w$, and adding the doubled amounts.
a. Write an expression for Sadie's way of calculating the perimeter. Write an expression for Eric's way as well.
b. Use both of the expressions to find the perimeter of a rectangle with length 30 and width 75 .
c. Explain why Sadie and Eric always get the same answer, no matter what the length and width of the rectangle are.
